

THE CIMCOOL® MIX MASTER S

Cutting fluid concentrate and water mixing device

The Cimcool Mix Master S is a low cost automatic mixing device that mixes Cimcool metalworking fluid concentrates with water instantly, accurately and economically. Through automatic mixing, problems such as human error, fluid spillage, contamination and excessive use of valuable concentrate are eliminated. Moreover, the Mix Master S gives better concentration control which in turn provides improved corrosion, stability and foam control as well as improved tool life and surface finish with less chance of metalworking fluid residue. As a result, fluid life is prolonged and metalworking fluid costs are significantly reduced.

CIMCOOL®

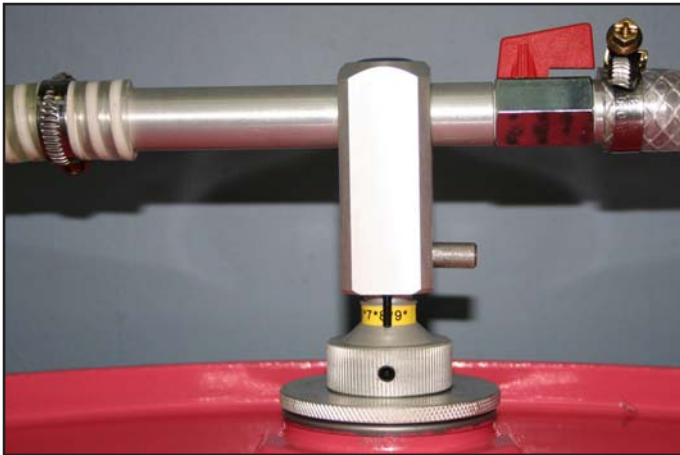

SOLUTIONS LEAD TO SAVINGS

*Instantly,
accurate and
economical*

Installation is easy and takes a few minutes. The instrument is maintenance-free and guaranteed to give trouble-free, accurate mixing of metalworking fluid concentrate. If required, the instrument can be relocated from drum to drum with minimum difficulty.

The required concentration can easily be obtained by setting the regulator to the correct number.
